2. Awarded the title of 'Best out-going student' for the year 2003 at Sharada PU College, Mangalore.

**TEACHING EXPERIENCE:**

Conducted clinical sessions and theory classes for the undergraduate students as a Post Graduate in Department of General Surgery, Bangalore Medical College and Research Institute from May 2010-April 2013. Also conducted classes for under graduates on topics related to plastic surgery at St. John's Medical College during the M.Ch course.

**WORK EXPERIENCE:**

Victoria Hospital, Bangalore is a tertiary care teaching hospital which is now the second largest Hospital in India accommodating more than 1000 patients at a time. This is a teaching hospital and is attached to Bangalore Medical College and Research Institute, which is one of the premier Medical Colleges of India. Joined as an undergraduate in the year 2003, I completed my M.B.B.S degree in 2009. My interest in the field of surgery made me pursue my post-graduation in General Surgery through the All India Post Graduate entrance exam.

During my post graduate training in general surgery, my work included initial management of patients on a routine and emergency basis, attending ward rounds, clinics and grand rounds, participating in journal club, teaching sessions and inter-departmental meetings. My duties have included assisting the consultants in various surgeries. Other duties included attending regular teaching sessions and weekly out-patient clinics.

As a fellow in biodesign, I got an opportunity to explore the field of medical devices and the latest innovations. During the fellowship, I teamed up to invent a colostomy management device which is currently under clinical trial.

During my post graduate training in plastic surgery, I was exposed to various trauma cases and aesthetic procedures at St. John's Hospital, Bangalore. During my training, I also developed few innovative medical devices and published 2 books.

I have a keen interest in reconstructive surgery and wound care. In future, I intend to develop new devices and techniques in plastic surgery. Currently, I am looking forward at a centre to improve upon my clinical skills in plastic surgery at a reputed hospital.
